JURISI Co	DICTIONAL DET) ompleted: Desktop Site visi	determination		Date: June 1, 2007 Date(s):	
Ju	risdictional Determ	ination (JD):			
Ø	Preliminary JD - Based on available information, there appear to be (or) there appear to be no "waters of the United States" on the project site. A preliminary JD is not appealable (Reference 33 CFR part 331).				
	Approved JD – An approved JD is an appealable action (Reference 33 CFR part 331). Check all that apply:				
	There are "navigable waters of the United States" (as defined by 33 CFR part 329 and associated guidance) within the reviewed area. Approximate size of jurisdictional area:				
	There are "waters of the United States" (as defined by 33 CFR part 328 and associated guidance) within the reviewed area. Approximate size of jurisdictional area:				
	There are "isol	lated, non-navigable, Decision supported Jurisdiction.	<i>intra-state</i> by SWAN	e waters or wetlands" within the reviewed area. ICC/Migratory Bird Rule Information Sheet for Determination of No.	
A.	Waters defined un The presence of wa	ters that are subject to	9 as "nav	rigable waters of the United States": and flow of the tide and/or are presently used, or have been used in interstate or foreign commerce.	
	(1) The presence of interstate or foreign (2) The presence of (3) The presence of sandflats, wetlands, destruction of which (i) which are of (ii) from which (iii) which are (4) Impoundments (5) The presence of (6) The presence of	waters, which are cut commerce, including interstate waters including other waters such as sloughs, prairie poth h could affect interstar could be used by into fish or shellfish are correctly or could be used for it of waters otherwise data tributary to a water territorial seas.	rrently use g all water juding inte intrastate oles, wet in the comme erstate or or could be industrial per interest as we identified	lakes, rivers, streams (including intermittent streams), mudflats, meadows, playa lakes, or natural ponds, the use, degradation or cree including any such waters (check all that apply): foreign travelers for recreational or other purposes. e taken and sold in interstate or foreign commerce. Durposes by industries in interstate commerce.	
				on (applies to any bayes checked above). Hely investigated	

Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency

La	teral Extent of Jurisdiction: (Reference: 33 CFR parts 328 and 329)				
×	Ordinary High Water Mark indicated by: High Tide Line indicated by:				
	☐ clear, natural line impressed on the bank ☐ oil or scum line along shore objects

Bas	sis For Not Asserting Jurisdiction:				
닟	The reviewed area consists entirely of uplands.				
볼	nable to confirm the presence of waters in 33 CFR part 328(a)(1, 2, or 4-7).				
	Headquarters declined to approve jurisdiction on the basis of 33 CFR part 328.3(a)(3).				
L.3	The Corps has made a case-specific determination that the following waters present on the site are not Waters of the United States:				
	Waste treatment systems, including treatment ponds or lagoons, pursuant to 33 CFR part 328.3.				
	Artificially irrigated areas, which would revert to upland if the irrigation ceased. Artificial lakes and ponds created by excavating and/or diking dry land to collect and				
	and of the production of the p				
	retain water and which are used exclusively for such purposes as stock watering, irrigation, settling basins, or				
	nce growing.				
	Artificial reflecting or swimming pools or other small ornamental bodies of water created				
	by excavating and/or diking dry land to retain water for primarily aesthetic reasons. Water-filled depressions created in dry land incidental to construction activity and pits excavated in dry land for				
	Water-filled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction or excavation operation is				
	abandoned and the resulting body of water meets the definition of waters of the United States found at 33 CFR				
	328.3(a).				
	Isolated, intrastate wetland with no nexus to interstate commerce.				
	Prior converted cropland, as determined by the Natural Resources Conservation Service. Explain rationale:				
	Non-tidal drainage or irrigation ditches excavated on dry land. Explain rationale: Other (explain):				
	Contract (explain).

Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

The term "adjacent" means hydrering continuous or painthering. Wetlands are residentially and the corps wetland to be a significant of the corps wetland to be a significant of the corps wetlands.

²The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
